

## ***SEE Cooling and Züblin Scandinavia signing Sales & Marketing collaboration agreement.***

**SEE Cooling and Züblin** has agreed to jointly market **SEE Cooling Concept** to customers in Sweden, Finland and United Kingdom with a plan to extend reach over time. SEE Cooling Concept provide extremely energy-efficient cooling utilising free cooling and geothermal energy to deliver by far the lowest running costs in the industry. Special focus will be on High Density Data Centers, but the solutions is also applicable in all open environments.

**Züblin** adds access to the market, deep knowledge in geothermal energy and the capability to deliver turn key projects. Züblin work with Windborne International, Rock Energy Solutions and Bravida to deliver turn-key Ground Source Heating and Cooling installations to the Scandinavian market .

We strongly believe this collaboration will open up new market segments for both companies and provide the market with the proven SEE Cooling Concept solution installed at 200 sites in Sweden, Denmark and Austria.

Worlds Greenest Cooling Solution will make impact on the market being the most energy efficient cooling concept all categories.

### ***About SEE Cooling***

*SEE Cooling is a Swedish supplier of extremely energy efficient cooling systems for telecommunications, data centers, industry, office and public spaces. SEE Cooling Concept is based on cutting-edge patented Technologies that enable energy-efficient free cooling.*

*For the warmest periods ground collectors in boreholes are recommended, but a complete range of alternative options are available. SEE Cooling is now ready to offer this technology to the World market for the first time. SEE Cooling Concept is currently installed in more than 200 sites mainly in the Swedish telecom operator TeliaSoneras network. Visit [www.seecooling.com](http://www.seecooling.com) for more information.*
