

## SEE Cooling launch third generation SEE Cooler at Chillventa 2010, Nuremberg

**SEE Cooling Concept** provide extremely energy-efficient cooling utilising geothermal energy and simplified and optimized maintenance to deliver by far the lowest running costs in the industry.

**SEE Cooler** is a third generation energy efficient cooling unit with over 1500 units in operation. The product allows 100% free cooling up to about +15°C outside temperature. Low internal power consumption and high cooling effect compared to conventional technology. Built in redundancy and a minimum of moving parts make it optimal for high cooling effects W/m².

**SEE Cooler** is designed to work in a free cooling solution at coolant temperatures between +5 and 20°C. Available as Standard, Low Noise, Computer Floor and High Density Zone models; the latter with increased capacity and redundancy. Capacity ranges are from 5-56 kW/unit at 20°C coolant temperature.

World's Greenest Cooling Solution generates very low CO₂ emissions and Outstanding Total Economy in both new installations and upgrades of existing cooling systems. SEE Cooling Concept experience has been derived from more than 200 sites over 15 years. It is a proven product. The SEE Cooling Concept has been developed at TeliaSonera and is now for the first time offered to the market thru SEE Cooling AB.

Worlds Greenest Cooling Solution will make impact on the market being the most energy efficient cooling concept all categories.

## **About SEE Cooling**

SEE Cooling is a Swedish supplier of extremely energy efficient cooling systems for telecommunications, data centers, industry, office and public spaces. SEE Cooling Concept is based on cutting-edge patented Technologies that enable energy-efficient free cooling.

For the warmest periods ground collectors in boreholes are recommended, but a complete range of alternative options are available. SEE Cooling is now ready to offer this technology to the World market for the first time. SEE Cooling Concept is currently installed in more than 200 sites mainly in the Swedish telecom operator TeliaSoneras network. Visit <a href="www.seecooling.com">www.seecooling.com</a> for more information.
